

6th June, 2011

My daughter Ashley is 9 years old and was struggling with mathematical concepts. I felt she had put up a block to all things mathematical and had completely lost her confidence when it came to maths. In fact her teacher said she looked terrified when ever he mentioned they were about to do maths!

We located Gay after an extensive search and Ashley enjoyed a term with her each Thursday afternoon. She came away feeling she had made positive achievements and gained a better understanding of basic numeracy concepts. One on one tutoring certainly worked for her and she built up a positive rapport with Mrs Brown very quickly.

Thank you so much Gay for your patience, kindness and perseverance. Ashley now even cracks the occasional smile when maths is mentioned in class!

Kind regards,

Andrea and Mark Middleton
